

NORTH SCOTTSDALE ENDODONTICS & IMPLANTOLOGY

Shawn Anderson, D.D.S., M.S.D.

Dr. Anderson grew up in Las Vegas, Nevada and attended Brigham Young University. He pursued his interest in dentistry, and in 2005 he graduated with honors from Loma Linda University School of Dentistry in Southern California. Following dental school, he completed a hospital-based general practice residency at the University of Nevada School of Medicine. His practice of dentistry that followed included providing care for underserved children with a mobile clinic in addition to traditional patient care. Dr. Anderson's interests in endodontics lead him back to Loma Linda University, where he trained under Dr. Mahmoud Torabinejad, the developer of MTA, and other top educators in the field as a post-graduate resident. After earning his specialty certificate and Masters degree in 2009, he has been in private practice full-time.

In search of a great place to raise his family, Dr. Anderson has found his home here in Arizona. He enjoys spending time with his wife Melinda and their three sons (*right*), coaching sports, snowboarding (*lower right*) and being outdoors. He also takes the opportunity to provide dental care for others in great need, sometimes traveling to such places as the Philippines, Mexico, and Guatemala (*lower left*).

Dr. Anderson joined with Dr. Thomas McClammy at North Scottsdale Endodontics, a coherent match, as both doctors are passionate for their work. North Scottsdale Endodontics has proven to be a leader in endodontics through maintaining the latest technology and techniques while pursuing the highest quality patient care. All procedures are performed with surgical operating microscopes, advanced instruments, digital imaging, and contemporary materials. We are also excited to have Cone Beam Volumetric Imaging technology right in our office, allowing us to capture 3-dimensional images that provide us with tremendous information for conventional endodontic treatment as well as all phases of surgery.

Throughout his training and experience, Dr. Anderson has cultivated a depth to his abilities including caring for medically compromised and pediatric patients, surgical placement of implants, sedation, and guided tissue regeneration. As an endodontist these foundations provide a deeper understanding of the patient's treatment plan and a greater ability to contribute as a member of the dental team. His desire to provide compassionate and gentle care for his patients while utilizing the most current treatment concepts and techniques is unsurpassed. His addition to North Scottsdale Endodontics further reinforces our commitment to providing the best endodontic care possible.

For more information about North Scottsdale Endodontics, visit their website at www.nsendodontics.com or call the office at (480) 731-ENDO (3636). The office is located at 8765 East Bell Road, Ste. 213, Scottsdale, AZ 85260, just off the 101 Freeway.
